

# SWIFT Secondary Masterclass Series 2022 - 2023 | Geography

## Introduction to Masterclasses

SWIFT understands the value of subject specific training and is offering Subject Masterclasses for secondary teachers with keynotes and delivery by experts in their field.

This Geography Masterclass series has been organised and planned by Leah Carrington, an experienced Teacher of Geography and Delivery Lead on the Early Career Framework. Each session is relevant to experienced and new Teachers of Geography, Heads of Geography and any SLT who wish to understand Geography better.

## Course Structure

The Geography Masterclass series consists of **five** online after school sessions. Each session draws on the additional expertise of consultants and strategic partners.

The content identifies the specific knowledge and skills for teaching Geography and enables you to reflect on your own practice, identify opportunities to strengthen your knowledge and direct your own professional learning.

Whilst there will be an element of reflection and you would benefit from attending the programme as a whole, each session is also stand-alone, allowing you to dip into the programme and each session will be recorded for use by your Subject Team in your own school setting.

### Session 1 | The Opportunities and Challenges of a Common Curriculum | Jo Payne

Tuesday 4 October 2022 | 1545 – 1645

### Session 2 | Making the Most of Fieldwork | Catherine Owen
